Part III DETAILED ACTION

1. Claims 2-5, 7, 10-17 are pending.

Restriction/Election

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Groups I-XXV. Claims 2-5, 7, 10-14, and 16-17 are drawn to 25 patentably distinct 16-mer peptides (SEQ ID NOS 1-2, 5-6, 12, 16-20, 28-30, 34, 37-39, 46-48, 53-57), classified in class 530, subclass 326.

Group XXVI. Claim 15, drawn to a method of treating with nonamers, classified in class 514, subclass 15.

The inventions are distinct, each from the other because of the following reasons:

3. Groups I-XXV are unique products. They differ with respect to their physicochemical properties and are therefore patentably distinct.

Groups I-XXV and XXVI are unrelated products and methods and are therefore patentably distinct.

4. Because a search of these 26 distinct inventions would not be co-extensive with a search of the others, an examination and search of two or more inventions in a single application would constitute a serious undue burden on the examiner.

5. Applicant is notified that if Group XXVI is amended to be identical in scope to the allowed product claims in U.S. Patent No. 6,184,204, Group XXVI will be searched along with whatever Group is elected.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor or at least one claim remaining in the application. Any amendment of the inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17 (h).
